Subject: Stop the Atlantic Coast Pipeline

Michael Regan,

Fracked gas is poisonous both before and after combustion. It threatens North Carolinians who live near the pipeline before it is burned and it threatens all of us after it is burned. Fracked gas should not be part of our future. The money spent on the pipeline should be spent to free North Carolina from carbon fuels. If the calamities from Hurricane Harvey and Irma are insufficient to signal the threat that carbon in our environment poses, then we are beyond even God's help.

Bill Ward
